## 32<sup>nd</sup> meeting, Budapest 30-31 May 2011

Links to open source management system. The list is compiled by Daniel D'Esposito and allow us to try these softwares before the meeting.

### 1. Senayan SLIMS

<http://senayan.diknas.go.id/web2/>

This is my favorite, I came across it by chance in Jakarta last month, its made by Indonesian developers and used by NGOs and the NHRI. But it's unknown in the rest of the world. I am hoping it will be the winner so we can promote it like crazy.

### 2. OpenBiblio and Web Biblio

<http://obiblio.sourceforge.net/>

<http://openbiblio.huritech.org/home/index.php>

<http://webbiblio.sourceforge.net/postnuke/index.php>

Demo: <http://webbiblio.sourceforge.net/demo/home/index.php>

Openbiblio.. I kind of liked its simplicity and was thinking of investing some time in improving its obvious deficiencies, but that was until I saw Senayan. I think this is a dead fish.

### 3. Koha

Site: <http://koha.org/>

Example of Koha in use: <http://koha.org/showcase/>

Koha, this is a very mature system, but perhaps more suitable for larger collections.

### 4. Greenstone

<http://www.greenstone.org/>

Examples: <http://www.greenstone.org/examples>

Greenstone, many use this, but I just find the software a bit aged and user-unfriendly. The URLs are so long that it must be a world record. Its not a dead fish, but it doesn't smell very good.

### 5. Evergreen

<http://www.evergreen-ils.org/>

Demo: <http://demo.gapines.org/opac/en-US/skin/default/xml/index.xml>

Examples: [http://www.evergreen-ils.org/dokuwiki/doku.php?id=evergreen\\_libraries](http://www.evergreen-ils.org/dokuwiki/doku.php?id=evergreen_libraries)  
Evergreen. I like this to, its a competitor to Koha, but I still prefer Senayan.

## **6. Invenio**

<http://invenio-software.org/>

Examples: <http://invenio-software.org/wiki/General/Demo>

Invenio: This is really powerful stuff, for huge collections of millions of documents with multiple collections.

## **7. Unesco's Java ISIS**
